ABOUT ME

I'm a software developer based in Mumbai, India, specializing in **Laravel, PHP, and MySQL**. I also have experience with **Redis, Microsoft Azure, Tailwind CSS**, etc. As an active member of the **Laravel Mumbai Community**, I stay engaged with the latest industry trends. I thrive in collaborative environments that value **open communication and teamwork**. I'm always eager to learn and adapt, continuously enhancing my skills to contribute effectively to innovative projects. To boost my coding efficiency, I leverage **AI tools and use AI-powered code editors like Cursor**. Beyond coding, I love to Swim and Cook.

WORK EXPERIENCE

Joistic Technologies

Mumbai, Maharashtra

Senior Backend Developer

Mar 2024 - Present

Achievements:

- Successfully delivered 18+ MVP projects, including 8 projects built completely from scratch, demonstrating strong project initialization and execution capabilities.
- Architected and developed 2 internal products.
- Led the development of multiple projects using the Filament admin panel, reducing development time while also maintaining code quality.
- Integrated AI services and LLMs across multiple projects, used models including OpenAI GPT-4, GPT-3.5, and Anthropic Claude, enabling features like content generation, image processing, etc.
- Designed and implemented scalable RESTful APIs for cross-platform mobile applications, ensuring seamless integration between frontend and backend systems.
- Implemented service-based architecture patterns across projects, ensuring maintainable and scalable codebases.
- Utilized Redis caching strategies to optimize application performance and reduce database load.
- Integrated multiple payment gateways and third-party services while maintaining robust security standards.
- Worked directly with non-technical startup founders.
- Reduced development cycles by 30% through efficient use of Filament admin panel and TALL stack
- Successfully managed and delivered 6+ MVP projects from scratch.

edge CRM - Your Strategic Growth Partner.

Mumbai, Maharashtra

Sr. Software Solution Engineer

Dec 2022 - Mar 2024

Internal Achievements:

- Recognized as a leader and a vital member of the Ignite Leadership Team.
- Initiated the Laravel Mumbai community meetup.
- Orchestrated the first JSlovers meetup in Mumbai.

E-commerce Food delivery portal (US Client):

- Created project from scratch. - Strategized and designed the system and database.
- Led a backend team, defining responsibilities for optimal project execution.
- Successfully implemented multi-tenancy functionality

- Integrated payment gateways, fulfillment services, BPM, and shipment services seamlessly.
- Automated the system through the addition of multiple cron jobs.
- Used various packages to enhance performance.
- Implemented a Service-Based Design Pattern for robust scalability.
- Enhanced system speed by incorporating the Redis cache
- Strengthened API security through the addition of custom middleware.
- Implemented queues for efficient handling of synchronous tasks.

Asia's Largest government body (BMC):

- Led 3 projects for Asia's Largest government body (BMC) as a backend developer.
- One of them was completely created from scratch where I built an offline ticketing system that seamlessly improved the overall experience. the system had a feature that synced multiple devices to the server.
- Improved security by 50% for one of the projects where multiple PII APIs were exposed.
- Seamlessly integrated multiple payment gateways across these systems.
- Automated 25% of the processes by implementing CRON jobs.
- Made the export functionality 10x Faster.
- Reduced the production issues by 70%.
- Developed and delivered multiple modules.
- Provided API's for Mobile apps (IOS and Android).
- Elevated the client's overall experience.
- Stabilized the system through code refactoring and optimization.

Big Rattle Technologies

Mumbai, Maharashtra

Software Engineer

Oct 2021 - Dec 2022

- Designed a web-based application that made it more comfortable and faster for users to issue insurance.
- Created well-structured documentation for client requirements which made team efficiency 30% smoother.
- Optimized existing code to make client website 20% faster and more competent.
- Encrypted the user's PII data in the database, making the client's website 35% more secure.
- Developed numerous Backend APIs and consumed them on the front end.
- Upgraded the entire project from Laravel/PHP 5.8 to Laravel/PHP 9 helping the client to be faster and more secure.

Tekno Point

Mumbai, Maharashtra

Trainee Developer

Jun 2021 - Nov 2021

- Created APIs using Java Servlets which helped clients process faster.
- Solved user production issues on a project using MySQL database queries which reduced user complaints by 20%.

Hasbasoft Technology Pvt Ltd

Mumbai, Maharashtra
